[www.caderoyal.com](https://www.caderoyal.com)

## Education

---

<b>College Station, TX</b>	<b>Texas A&amp;M University</b>	<b>August 2021- May 2025</b>
----------------------------	---------------------------------	------------------------------

- **Major:** Computer Science GPA: 3.91 (in-major GPA: 4.0)
- **Programming Coursework:** Data Structures and Algorithms, Discrete Structures in Computing, Computer Organization, Programming languages, etc.

## Employment

---

<b>Summer Manufacturing Assistant</b>	<b>Reynolds and Reynolds</b>	<b>May 2023- Current</b>
---------------------------------------	------------------------------	--------------------------

Keytrak (<https://www.reyrey.com/solutions/vehicle-management/keytrak-edge>): Tracking car keys for dealerships

- Built servers for deployment in dealerships
- Built rapport inside Reynolds and Reynolds in order to secure software engineering internship for Summer 2024
- Learned about hardware and software functionality

---

<b>Student Assistant</b> <b>2023</b>	<b>Texas A&amp;M University Department of Chemistry</b>	<b>August 2022- May</b>
---	---	-------------------------

X-ray Diffraction Laboratory (<https://xray.chem.tamu.edu/>) and NMR Laboratory (<https://nmr.chem.tamu.edu/>)

- Designed and Built Oxygen Monitoring System using an arduino for Helium Recovery Facility
- Refilled Cryogens for both NMR and X-Ray Diffractions laboratories
- Was responsible for general laboratory cleanliness in X-ray diffraction lab
- Will continue to work here during school year, working elsewhere during summers

## Software Projects

---

**Personal Website:** [www.caderoyal.com](https://www.caderoyal.com) (for additional information)

### Personal Website

- Developed webpage using HTML and CSS for personal and professional use
- Integrated an embedded pdf that will work on both desktop and mobile browsers
- Hosted on Github using Github pages
- Utilized: HTML/CSS, Git, etc.

### Attendance Application

- Developed application to keep track of fictitious "attendance logs" for Programming Languages Course (CSCE 314)
- Given input file of raw data, established objects and data structures to store said data
- Utilized: JavaFX, Java, fxml files, etc.

### Oxygen Monitoring System

- Built to monitor Oxygen levels in Helium Recovery Facility in order to detect potential Helium leaks
- Used an Arduino and oxygen sensor to set off lights and buzzers in cases of light and extreme conditions
- Utilized: C++, Git, etc.

## Skills

---

**Software:** (*proficient*): C++, Python, Unix, Java, Excel (*familiar*): HTML/CSS, Git, JavaFX, C
